

NaachiChat

FOR COMMUNITIES AND GROUPS

A TRUSTED HOME FOR MEMBER COMMUNITIES

Your community, verified. *Your number, yours.*

Real members. Hidden numbers. No impersonators. No spam calls. A space built for the way associations, cultural groups, and member organisations actually run.

A PRODUCT BY

Naachi Research and Innovation Foundation

2026 · BROCHURE

The moment you join the group, *your number is everyone's.*

Most communities live in large WhatsApp and Telegram groups. The day you join, your phone number becomes visible to hundreds of people you have never met. That is where the trouble starts.

- i. Members get spam calls from strangers who lifted their number from the group.
- ii. People impersonate office bearers to ask members for money, favours, or details.
- iii. Anyone with a forwarded link can walk in, and nobody can tell who is really a member.
- iv. Genuine announcements get buried under forwards and chatter.
- v. When someone leaves or is removed, their access is gone but every number is already out there.

The result: less trust, more noise, and the people who matter most are the most exposed.

A trusted space where *everyone is who they say they are.*

NaachiChat gives your community a verified, referral-based home. Every member is confirmed. Phone numbers stay hidden. And no outsider can slip in or reach your members without permission.

Organisers can shape the space around your community, creating chapters, regional wings, or committees like an events team or a welcome team, and assigning the right coordinators to each. The app mirrors how your community actually runs.

01**VERIFIED**

Every member and leader is confirmed.

02**HIDDEN NUMBERS**

Phone numbers stay hidden from all.

03**STRUCTURED**

Chapters and committees, mapped to how you run.

What members and organisers *actually* get.

Feature 01 IDENTITY

Verified office bearers and members

Members always know the president, secretary, and coordinators are genuinely them. No more impersonators asking for money or details in your community's name.

Feature 02 REACHABILITY

Phone numbers stay hidden

Be part of a large community and never expose your number to a single stranger. No more spam calls traced back to the group.

Feature 03 ACCESS

Referral-based entry

Only real members get in. No random people walking in through a forwarded link, no accounts nobody can place.

Feature 04 BOUNDARIES

No strangers can reach you

Members are contacted by consent. An outsider cannot cold call or message your people just because they found the group.

Feature 05 **BROADCAST**

Announcements from verified leaders

Reach the whole community, a single chapter, or one committee in a single message from a source members can trust. Important updates stop getting lost.

Feature 06 **STRUCTURE**

Chapters and committees that fit

Organisers create regional wings, event teams, or working committees and assign coordinators to each, so the right people handle the right things.

Feature 07 **TRUST**

Report bad actors, discreetly

If someone misbehaves or impersonates a leader, members can report it to the organisers quietly, and it gets handled.

Feature 08 **SAFETY**

Built for safety

Hidden numbers, consent-based contact, and verified members directly cut down the spam calls, impersonation, and unwanted approaches that hit members hardest. This is how the app is built to behave, not a slogan.

Eight features, one promise: real members, hidden numbers, and a space that behaves itself.

Run a community of ten thousand *from one place.*

Community leaders get organiser tools that match the size of the job: bring the whole membership list in at once, structure it into subgroups, reach everyone in a single message, and act on what members report.

Upto 10,000

members imported in a single upload.

One message

broadcast to every member at the same time.

Unlimited

departments, each allocated to its own verified admin.

Tool 01 BULK IMPORT

Bring the whole membership list in at once

Organisers upload the existing member list, whether that is 500 people or 10,000, in one bulk import. Everyone on the list is invited, verified, and ready to join, with no adding members by hand.

Tool 02 SUBGROUPS

Create and manage subgroups

Leaders divide the community into chapters, regional wings, and departments, and allocate each one to a different admin. Every admin carries the verified symbol beside their name, so members can see who runs what.

Tool 03 BULK UPDATES

Broadcast to everyone at once

Send one update and every member receives it at the same time, or narrow it to chosen chapters and committees. It arrives from a verified leader, so members know it is genuine.

Tool 04 OVERSIGHT

Review reports of unauthorised contact

Every report a member files reaches the organisers with the account, the time, and what happened, so leaders can look into unauthorised contact or impersonation and act on it.

Set up in *four simple steps.*

01

Organisers create the space

Your community is set up with verified organisers, who create any chapters or committees the community needs.

02

Members join by referral

Everyone inside is genuine. No forwarded links, no walk-ins from strangers.

03

Verified identities, hidden numbers

Everyone takes part as themselves, without their phone number being exposed to anyone.

04

One trusted place for everything

Announcements, discussions, and reports all live together, with the right people seeing the right things.

What NaachiChat does, *and what it doesn't.*

WHAT IT DOES

- Confirms every member and every leader is real.
- Keeps phone numbers hidden from everyone.
- Keeps outsiders out by design.
- Lets members report bad actors without exposure.

WHAT IT DOESN'T CLAIM TO BE

- It is not a surveillance tool. Organisers see what they need to run the community, not everyday conversations between members.
- It does not promise nothing bad can ever happen. It removes the common risks and makes the rest easier to handle.

Bring your community onto *NaachiChat*.

Get in touch and we will set up a verified space for your members, with no exposed numbers, no impersonators, and no spam. We will walk your organisers through the whole thing and talk you through how it works for a community your size.
